Disposal costs for de-icing of aircrafts 2018/2019

Dear Sir or Madam,

as the winter season 2018/2019 and the necessary de-icing actions provided by us have just begun, we want to inform you that Cologne Bonn Airport is required to realize a professional disposal of the effluent de-icing fluid (Clariant-water-mixtures) due to reasons of water protection.

Until now the final disposal costs are not known, so there will be a final charging* in 2019 (2. quarter). At the moment we will charge you for any de-icing action according to the valid price list:

MP II: 1 litre of de-icing fluid 3,85 € / 1 litre of hot water 0,14 €
MP I: 1 litre of de-icing fluid 4,98 € / 1 litre of hot water 0,14 €

(*apportionment in the last season 2017/2018 amounted 0,51 € / litre de-icing fluid)

Airlines that pay cash at the airport do not participate in the apportionment; they pay in a lump-sum (4,50 €/L. for MP II or 5,63 €/L. for MP I fluid and 0,14 €/L. for hot water).

Yours sincerely,
Cologne Bonn Airport
i.A.
