

Cologne Bonn Airport

Smart Flying

Setting Off
Well Prepared

1 Take Off Without Any Worries

We are delighted to welcome you as our passenger. Even though trouble-free travel is possible again now, the pandemic still has an impact on the complex processes at the airport involving many partners. For example, these include checking health certificates, increased hygiene standards and a longer security check. At busy times, in particular, this may lead to longer waiting times.

You can help to ensure smooth processing by being prepared and allowing more time than usual. Our travel tips and the check list will help to ensure that you set off on holiday as quickly as possible.

2

Preparation at Home

The more you do at home, the calmer your time at the airport will be.

Please take only one piece of hand baggage. The less you have with you, the quicker the check.

Sharp objects (e.g., knives) are not permitted in hand baggage. A cigarette lighter is permitted in hand baggage (no Zippo lighters, or similar designs).

Liquids and creams (up to 100 ml per container) must be placed in a sealable 1-litre plastic bag (except for medication/infant formula).

Do not pack technological devices at the bottom of your hand baggage; they will be taken out at Security.

Check whether your passport is valid. Find out about the requirements of the airline and the destination country. Have you got all your certificates easily to hand?

Plan your arrival with some time to spare and, if required, book a parking space on the airport website.

If you have limited mobility, register with the airline/ tour operator in advance for assistance from our mobility service.

Check in online and, if possible, use the late-night check-in facility. Go to the airport website to check whether your airline offers this service.

If requested, take a covid test the day before you fly.

3

At the Airport

Please find out the check-in time for your airline and allow a bit more time - **at least a good 2 hours**.

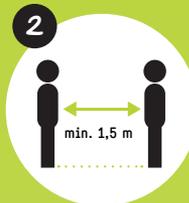

There are lots of shops and food and drink options at the airport (opening hours on the airport website). There is a lounge, subject to a fee, and smoking areas in the Security area.

The terminal service staff will be happy to answer any further questions you may have.

Please continue to observe the protection and hygiene rules that continue to apply:

The airport urgently recommends wearing a face mask

Maintain social distancing, practise coughing and sneezing etiquette

Sanitiser stations are available at the airport

4

Getting Through Security Checks Quickly

The security check in Terminal 1 is carried out by a member of security staff on behalf of the Federal Police. You can help to ensure it is quick.

Put small objects in your baggage/jacket pocket beforehand.

Empty or dispose of drinks bottles.

Bags for liquids are available from machines before you get to Security.

Take off your jacket/coat. Place your baggage in a tray, technological devices separately.

We recommend wearing a face mask in Security (when requested, lower it briefly).

Please follow the instructions of the Security staff.

5

On the Return Journey

You can find entry requirements in the Federal Government's current Coronavirus Entry Ordinance. Consult the Robert Koch Institut's website to check whether your destination country is a high-risk area or the site of a variant of concern.
