

Central control point Gate A

The new security concept at Cologne Bonn Airport

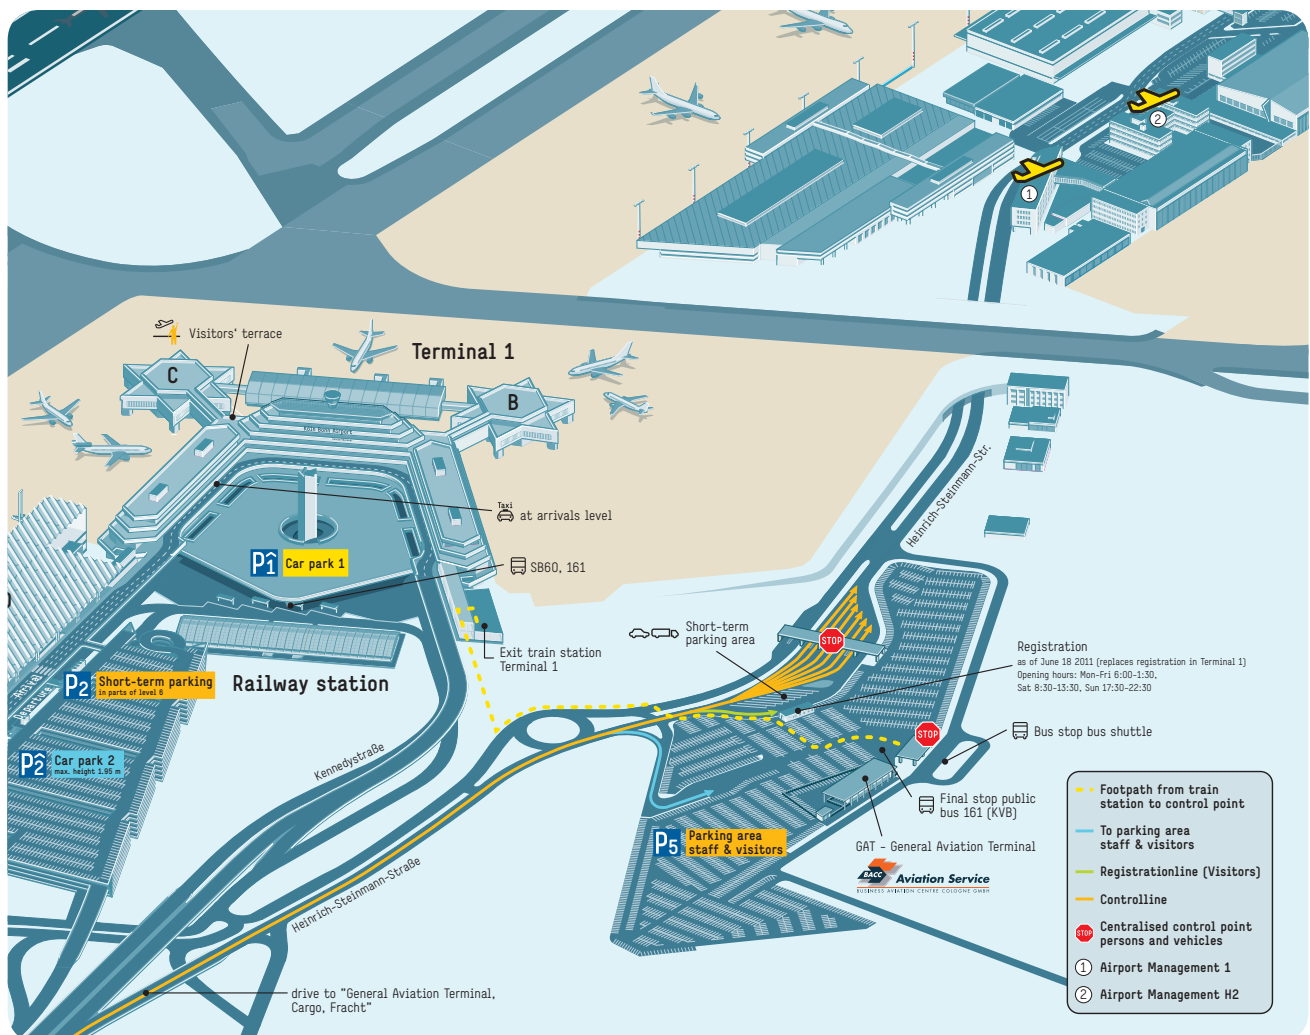

Traffic lane „Controlline“

The „Controlline“ lane may be used by persons with valid Airport-ID-Card and approved vehicles, after the personal and vehicel control has taken place.

Short-term parking area and traffic lane „Registrationline“

This area is reserved for persons/vehicles who are not covered by „Freeline“ or „Controlline“ (visitors, suppliers, service providers, customer services, technicians, etc.). For entry into the sensitive security area, a valid personal/vehicle-ID card is required. You will receive one at the registration point; the short-term parking area for trucks or passenger vehicle

Before entry to the sensitive security area, persons and vehivles are controlled.

To ensure swift controls and to avoid delays in procedures:

-  Journeys within the sensitive security area are to be kept to the necessary minimum.
-  The carrying of unnecessary object on one's person or in vehicles should be avoided when access to the sensitive security area is required, as this prolongs the control procedure and the waiting time.
